3BIO: Journal of Biological Science, Technology and Management

Guidelines for Authors

Submitting your manuscript: 3BIO: Manuscript should be submitted through our online submission system to ensure rapid review and allows authors to track the progress of their papers. A user ID and password for the site can be obtained on first use. Manuscript and cover letter should be uploaded as Microsoft Word documents. Figures should be embedded at the end of the manuscript or separately as JPEG, GIF, TIFF or EPS files.

First time users must be registered first before submitting a new manuscript. Submissions by anyone other than one of the authors will not be accepted. The submitting author takes responsibility for the paper during submission and peer review. If for some technical reason submission through the online submission system is not possible, the author may contact the editorial office for help via e-mail (support3BIO@itb.ac.id).

Type of articles: Articles may be in the form of Research article, Review article or Short communication. Research articles are reports of recent advances on the research of selected topics. Short communications are concise, but independent report representing a significant contribution in the field.

Manuscript form: All manuscript must be written in English. Please ensure the following when submitting your manuscript to 3BIO:

1. The submission has not been previously published, nor is it before another journal for consideration
2. The manuscript adheres to the given Manuscript Template and in Microsoft word document format.
3. Cover letter adheres to the template provided with contact details (email address/WhatsApp number) of the corresponding author have been provided

Plagiarism and AI Screening

Every submitted manuscript will undergo plagiarism checking and AI-generated content detection. This is to ensure that every manuscript aligns with the ethics of academic writing. We use three conditions for plagiarism:

- Similarity score \leq 25% means that the manuscript can proceed to the peer-review process
- Similarity score $>$ 25%, but $<$ 80% means that the manuscript will be returned to the author(s) for revision
- Similarity \geq 80% means that the manuscript will be rejected.

We also use the same application to detect AI-generated content. Although there are still the possibilities of false positive in AI detection, we use the rule that if AI-generated content is detected above 50%, the manuscript will be returned to the author(s) for revision.

File Size and Format

Please avoid submitting unnecessarily large files. All images should be 300 dpi of resolution at their final size. Check the resolution of your image by enlarging it to 150%. If the image appears blurry, this means that the resolution is too low. The following formats are accepted: JPEG (.jpg), and PNG (.png). Do not scan pages of text and printed Figures unless no original digital document exists.

Articles should be submitted in Microsoft Word format (.DOC). We cannot accept Acrobat .PDF or any other text files. Please refer to our manuscript format available [here](#).

Readability: Papers must be written in academic English and communicate an unambiguous message. A paper may be returned to the corresponding author due to inadequate English. We recommend that authors consult with professional translators and academic proofreaders before submitting their manuscript to our journal.
