Penyerahan artikel untuk dimuat dalam Acta Pharmaceutica Indonesia merupakan jaminan bahwa artikel tersebut tidak akan diserahkan untuk dipublikasikan dalam suatu medium komunikasi lain. Dewan Redaksi hanya mempertimbangkan artikel yang dapat dimuat dalam salah satu rubrik yang isi dan susunan ilmiahnya memenuhi syarat Acta Pharmaceutica Indonesia.

Editorial

International Seminar on natural product medicines (ISNPM2012) was successfully held in Bandung in November 22-23th, 2012. This seminar is organized jointly by School of Pharmacy, ITB and the Association of Indonesian Researchers on Natural Product (PERHIPBA) which was aimed to share information, researches findings and to empower national and international network among researchers, institutions and natural product industries. All related topics such as pharmacognosy, phytochemistry, pharmacology of natural products, natural products technology and synthesis, plant medicinal chemistry, medicinal plant biotechnology, biosynthesis of active natural products as well as development and practices of traditional medicines were presented in a key note lecture, 12 plenary lectures, 60 oral and 90 poster presentations. The presenters come from several countries such as Indonesia, Malaysia, Vietnam, Korea, China, Germany, Japan, Queensland, etc.

The use of natural product medicine has emerged from traditional to modern therapy in order to increase the quality of health worldwide. To prove pharmacological effects of medicinal plants and to further develop the rational use of herbal medicines, scientific approaches are essential. The development of sciences and technologies has highly supported the research on natural product medicines in all aspects. Recent findings from research in natural product medicines were major focus in this seminar. Beside of scientific session there were exhibition from several companies and institutions which displayed their product and innovations, there was a dinner after the first day seminar.

In collaboration with Elsevier publisher, 32 selected review and research papers were published in *Procedia Chemistry*, a high impact factor journal as special issues dedicated to this seminar *Procedia*. Some papers were published in several journals submitted independently by authors. Some other selected papers are published in the special issue of *Acta Pharmaceutica*, a journal published by School of Pharmacy, Institut Teknologi Bandung. All papers submitted to the *Acta Pharmaceutica* were peer reviewed, therefore the participants were encouraged to prepare the paper prior submission. At the end, 7 selected research papers were accepted to be published in the *acta Pharmaceutica* after intensive reviewing process by journal editors

The organizing committee would like to thank all invited speakers and participants for their sharing and contributions in making this seminar become a success and fruitful seminar. Finally we would like to express our deepest appreciation to all sponsors and supporting bodies for the seminar especially the School of Pharmacy, ITB, PERHIPBA, and Directorate General of Higher Education, Indonesian Ministry and Education (*DIKTI*). We sincerely do hope that all ISNPM2012 activities could run well, then it could benefit to all participants and their institutions. We appreciate the decision of the *Acta Pharmaceutica* to accept our submission for publishing of the selected papers of ISNPM2012

Dr. Elfahmi
