List of Reviewers

1. Akhmad Zainal Abidin (Design and Development Chemical Engineering Product Research Group, Faculty of Industrial Technology, Institut Teknologi Bandung, Indonesia)
2. Mohammad Ali Ahmadi (Department of Petroleum Engineering, Ahwaz Faculty of Petroleum Engineering, Petroleum University of Technology, Islamic Republic of Iran)
3. Chintan Amrit (Industrial Engineering and Business Information Systems Department, Twente University, Netherlands)
4. Sivakumar Anandan (King Khalid University, Kingdom of Saudi Arabia)
5. Rizki Armanto (Engineering Physics Research Group, Faculty of Industrial Technology, Institut Teknologi Bandung, Indonesia)
6. I Made Astina (Energy Conversion Research Group, Faculty of Mechanical and Aerospace Engineering, Institut Teknologi Bandung, Bandung, Indonesia)
7. Mohamed Azab (Dept. of Electrical Engineering Technology, High Institute of Technology, Benha University, Egypt)
8. Tsvetanka Babeva (Institute of Optical Materials and Technologies, Acad. J. Malinowski, Bulgarian Academy of Sciences,, Bulgaria)
9. Raúl Baños (Dpt. Computer Architecture and Technology, CITIC-UGR (Research Centre on Information and Communications Technology), University of Granada, Spain)
10. Arif Basuki (Material Science and Engineering Research Group, Faculty of Mechanical and Aerospace Engineering, Institut Teknologi Bandung, Indonesia)
11. Yazid Bindar (Energy and Chemical Engineering Processing System Expertise Group, Faculty of Industrial Technology, Institut Teknologi Bandung, Indonesia)
12. Robert Bucki (The College of Informatics and Management in Bielsko-Biala, Poland)
13. Fabíola D S Curbelo (Chemical Engineering Department, Federal University of Paraíba, Brazil)
14. Urmil V. Dave (Nirma University of Science and Technology, Department of Civil Engineering, India)
15. Nurhan Ecemis (Civil Engineering Department, Izmir Institute of Technology, Turkey)
16. Elizabeth Elias (Department of Electronics and Communication Engineering, National Institute of Technology, India)
17. Werner Fuch (University of Natural Resources and Applied Life Sciences - Vienna, Department of IFA-Tulln, Institute for Environmental Biotechnology, Austria)
18. Mayank Goswami (University Of California Davis, United States)

19. David Greiner (Institute of Intelligent Systems and Numerical Applications in Engineering (SIANI), Universidad de Las Palmas de Gran Canaria, Spain)
20. Naohiro Goto (Department of Environmental and Life Science, Toyohashi University of Technology, Japan)
21. Rajesri Govindaraju (Industrial System and Techno-Economics Research Division, Faculty of Industrial Technology, Institut Teknologi Bandung, Indonesia)
22. Bambang Kismono Hadi (Light Weight Structures Research Group, Faculty of Mechanical and Aerospace Engineering, Institut Teknologi Bandung, Indonesia)
23. Hiroshi Hashimoto (Advanced Institute of Industrial Technology, Shinagawa-ku, Tokyo, Japan)
24. Maogang He (Key Laboratory of Thermo-Fluid Science and Engineering of MOE, School of Energy and Power Engineering, Xi'an Jiaotong University, China)
25. Martin A. Hubbe (Department of Forest Biomaterials, North Carolina State University, United States)
26. Iswandi Imran (Structural Engineering Research Group, Faculty of Civil and Environmental Engineering, Institut Teknologi Bandung, Indonesia)
27. Antonius Indarto (Department of Chemical Engineering, Faculty of Industrial Technology, Institut Teknologi Bandung, Indonesia)
28. Yuli Setyo Indartono (Energy Conversion Research Group, Faculty of Mechanical and Aerospace Engineering, Institut Teknologi Bandung, Bandung, Indonesia)
29. Idawati Ismail (Faculty of Engineering, Universiti Malaysia Sarawak, Malaysia)
30. Abdul Jayaputra (Geotechnical Engineering Research Group, Faculty of Civil and Environmental Engineering, Institut Teknologi Bandung, Indonesia)
31. Endra Joelianto (Instrumentation and Control Research Group, Engineering Physics, Faculty of Industrial Technology, Institut Teknologi Bandung, Indonesia)
32. Zhu Jun (Faculty of Geosciences and Environmental Engineering, Southwest Jiaotong University, China)
33. Chungdann Kan (Department of Surgery, National Cheng Kung University Hospital, Taiwan)
34. Sutha Khaodhiar (Chulalongkorn University, Department of Environmental Engineering, Thailand)
35. Byeongyong Kong (Korea Advanced Institute of Science and Technology, Republic of Korea)
36. Adit Kurniawan (Telecommunication Engineering Research Group, School of Electrical Engineering and Informatics, Institut Teknologi Bandung, Indonesia)

37. M. Syahril Badri Kusuma (Water Resources Engineering Research Group, Faculty of Civil and Environmental Engineering, Institut Teknologi Bandung, Indonesia)
38. Dianika Lestari (Chemical Engineering Product Design and Development Research Group, Faculty of Industrial Technology, Institut Teknologi Bandung, Indonesia)
39. Chao Li (Harbin Institute of Technology Shenzhen Graduate School, China)
40. Huafeng Li (College of Automation, Chongqing University, China)
41. Zeyu Li (School of Electric Power, South China University of Technology, China)
42. Bonar Tua Halomoan Marbun (Drilling, Production, and Management of Oil and Gas Research Group, Faculty of Mining and Petroleum Engineering, Institut Teknologi Bandung, Indonesia)
43. Hongbin Ma (College of Resources and Civil Engineering, Northeastern University Liaoning)
44. Ajay K. Mandal (Indian School of Mines University, Department of Petroleum Engineering, India)
45. Anne Mandy (Clinical Research Centre, University of Brighton, United Kingdom)
46. Moch Agoes Moelyadi (Flight Physics Research Group, Faculty of Mechanical and Aerospace Engineering, Institut Teknologi Bandung, Bandung, Indonesia)
47. Veronica S. Moertini (Informatics Department. Faculty of Information Technology and Science. Parahyangan Catholic University, Indonesia)
48. Ehsan Najafi (Department of Energy Conversion, Faculty of Electrical Engineering, Universiti Teknologi Malaysia, Malaysia)
49. Suprihanto Notodarmojo (Research Group of Water and Wastewater Engineering, Faculty of Civil Engineering and Environment, Institut Teknologi Bandung, Indonesia)
50. Nuryono (Department of Chemistry, Gadjah Mada University, Indonesia)
51. Poerbandono (Geodesy Research Group, Faculty of Earth Sciences and Technology, Institut Teknologi Bandung, Indonesia)
52. Theodor Dan Popescu (National Institute for Research and Development in Informatics, Romania)
53. Awali Priyono (Global Geophysics Research Group, Faculty of Mining and Petroleum Engineering, Institut Teknologi Bandung, Indonesia)
54. Sri Raharno (Mechanical Production Engineering Research Group, Faculty of Mechanical and Aerospace Engineering, Institut Teknologi Bandung, Indonesia)
55. Syahrir Ridha (Petroleum Engineering, Universiti Teknologi PETRONAS, Malaysia)

56. José Álvarez Saiz ((Department of Chemical and Environmental Engineering, Universidad de Oviedo, Spain)
57. Jean Louis Salager (Universidad De Los Andes, Venezuela)
58. R. Sugeng Joko Sarwono (Engineering Physics Research Group, Faculty of Industrial Technology, Institut Teknologi Bandung, Indonesia)
59. Chengman Sha (Institute of Remote Sensing and Digital Mine, College of Resources and Civil Engineering, Northeastern University Liaoning, China)
60. Maryam Shirmohammadi (Faculty of Science and Engineering, Queensland University of Technology, Australia)
61. Togar M. Simatupang (School of Business and Management, Institut Teknologi Bandung, Indonesia)
62. Ngapuli Irmea Sinisuka (Electrical Power Engineering Research Group, School of Electrical Engineering and Informatics, Institut Teknologi Bandung, Indonesia)
63. Johnner Sitompul (Chemical Engineering Process Design and Development Research Group, Faculty of Industrial Technology, Institut Teknologi Bandung, Indonesia)
64. Bambang Sugeng Subagio (Transportation Engineering Research Group, Faculty of Civil Engineering and Environment, Institut Teknologi Bandung, Indonesia)
65. Agus Sujono ((Department of Electrical Engineering, Sebelas Maret University, Indonesia)
66. Wayan Suparta (Space Science Centre (ANGKASA), Institute of Climate Change, Universiti Kebangsaan Malaysia, Malaysia)
67. Adang Surahman (Structural Engineering Research Group, Civil and Environmental Engineering Faculty, Institut Teknologi Bandung, Indonesia)
68. N. Suriyamurthy (Radiological Safety Division, Indira Gandhi Centre for Atomic Research, India)
69. Herri Susanto (Energy and Chemical Engineering Processing System Expertise Group, Faculty of Industrial Technology, Institut Teknologi Bandung, Indonesia)
70. Bambang Riyanto Trilaksono (Control & Computer System, School of Electrical Engineering and Informatics, Institut Teknologi Bandung, Indonesia)
71. Dileep Kumar Upadhyay (Department of Electronics and Communication Engineering, Birla Institute of Technology (BIT), India)
72. Karupanna Velusamy (Indira Gandhi Centre for Atomic Research, India)
73. Bharat Vyakaranam (Department of Electrical and Computer Engineering, Cleveland State University, United States)
74. Shuren Wang (School of Civil Engineering and Mechanics, Yanshan University, China)

75. Zheng Wei Wang (State Key Laboratory of Hydrosience and Engineering, Department of Hydraulic Engineering, Tsinghua University, China)
76. Zhi Wang (National Engineering Laboratory for Hydrometallurgical Cleaner Production Technology, Institute of Process Engineering, Chinese Academy of Sciences, China)
77. Ketut Wikantika (Remote Sensing and Geographical Information Systems Research Group, Faculty of Earth Sciences and Technology, Institut Teknologi Bandung, Indonesia)
78. Hakan Yalciner (Civil Engineering Department, Eastern Mediterranean University, Cyprus)
79. Chao Yang (ARC Centre of Excellence for Geotechnical Science and Engineering, The University of Newcastle, Australia)
80. Yassierli (Ergonomics, Occupational and Safety Engineering, Faculty of Industrial Technology, Institut Teknologi Bandung, Indonesia)
81. Tao Yin (School of Civil and Architectural Engineering, Wuhan University, China)
82. Debao Yuan (College of Geoscience and Surveying Engineering, China University Of Mining & Technology, China)
83. Jahdi Zaim (Geology Research Group, Faculty of Earth Sciences and Technology, Institut Teknologi Bandung, Indonesia)
84. Feng-Liang Zhang (Research Institute of Structural Engineering and Disaster Reduction, College of Civil Engineering, Tongji University, China)
85. Zhousuo Zhang (State Key Laboratory for Manufacturing Systems Engineering, Xi'an Jiaotong University, China)

Journal of Engineering and Technological Sciences

Guidelines for Author

1. Standard of reporting

Authors should present an accurate account of the work performed as well as an objective discussion of its significance. Underlying data should be represented accurately in the paper. A paper should contain sufficient detail and references to permit others to replicate the work. Fraudulent or knowingly inaccurate statements constitute unethical behavior and are unacceptable. Professional publication articles should also be accurate and objective, and editorial 'opinion' works should be clearly identified.

2. Exclusivity of work

The authors should ensure that they have written entirely original works, and if the authors have used the work and/or words of others this should be appropriately cited or quoted. Plagiarism takes many forms, from 'passing off' another's paper as the author's own paper to copying or paraphrasing substantial parts of another's paper (without attribution), to claiming results from research conducted by others. Plagiarism in all its forms constitutes unethical publishing behavior and is unacceptable. An author should not in general publish manuscripts describing essentially the same research in more than one journal or primary publication. Submitting the same manuscript to more than one journal concurrently constitutes unethical publishing behaviour and is unacceptable. In general, an author should not submit for consideration in another journal a previously published paper. We consider for publication from conference paper if it is only an extended version of conference paper with at least 30% of new material.

3. Hazards and Human or Animal Subjects

If the work involves chemicals, procedures or equipment that have any unusual hazards inherent in their use, the author must clearly identify these in the manuscript. If the work involves the use of animal or human subjects, the author should ensure that the manuscript contains a statement that all procedures were performed in compliance with relevant laws and institutional guidelines and that the appropriate institutional committee(s) has approved them. Authors should include a statement in the manuscript that the informed consent was obtained for experimentation with human subjects. The privacy rights of human subjects must always be observed.

4. Authorship of the Paper and Copyright

Authorship should be limited to those who have made a significant contribution to the conception, design, execution, or interpretation of the reported work. All those who have made significant contributions should be listed as co-authors. Whilst those who have participated in certain substantive aspects of the research project, they should be acknowledged or listed as contributors. The corresponding author should ensure that all appropriate and inappropriate co-authors are included on the paper, and that all co-authors have seen and approved the final version of the paper and have agreed to its submission for publication. No manuscript can be published unless accompanied by a signed publication agreement, which serves as a transfer of copyright from author to publisher. A copy of that agreement is required after the paper is accepted.

5. Acknowledgement

Proper acknowledgment of the work of others must always be given. Authors should cite publications that have been influential in determining the nature of the reported work. Information obtained privately, as in conversation, correspondence or discussion with third parties, must not be used or reported without explicit, written permission from the source. Information obtained in the course of confidential services, such as refereeing manuscripts or grant applications, must not be used without the explicit written permission of the author of the work involved in these services.

6. Disclosure Requirements

Author when submitting a manuscript, must disclose any meaningful affiliation or involvement, either direct or indirect, with any organization or entity with a direct financial interest in the subject matter or materials discussed (for example, employment, consultancies, stock ownership, grants, patents received or pending, royalties, honoraria, expert testimony). These kinds of financial involvement are fairly common, unavoidable, and generally do not constitute a basis for rejecting a manuscript. Specifics of the disclosure will remain confidential. If deemed appropriate by the Scientific Editor, a general statement regarding disclosure will be included in the Acknowledgment section of the manuscript.

7. Errors in Published Works

When an author discovers a significant error or inaccuracy in his/her own published work, it is the author's obligation to promptly notify the journal editor or publisher and cooperate with the editor to retract or correct the paper. If the editor or the publisher learns from a third party that a published work contains a significant error, it is the obligation of the author to promptly retract or correct the paper or provide evidence to the editor of the correctness of the original paper.

8. Disclaimer

Opinions expressed in articles published in the *Journal of Engineering and Technological Sciences* are those of the author(s) and do not necessarily represent opinions of the Bandung Institute of Technology (ITB). The *Journal of Engineering and Technological Sciences* does not guarantee the appropriateness for any purpose of any method, product, process, or device described or identified in an article. Trade names, when used, are only for identification and do not constitute endorsement by *Journal of Engineering and Technological Sciences*.

9. Manuscript preparation

Use the English language and the SI system (Système International d'Unités, often referred as "International Units") for measurements and units. Manuscript in MS Word or PDF format (generated from MS Word) is to be submitted online through <http://journals.itb.ac.id/index.php/jets>. The length of manuscript is expected not to exceed 20 printed pages (single space) including abstract, figures, tables and references. An abstract between 100 and 200 words describes the significance of manuscript should be included. The authors should supply 5-10 keyword or phrases that characterizes their manuscript. Use 11 pt Times New Roman fonts for body of the text with 1.0 line spacing between lines. The references should be numbered consecutively in the order of their appearance and should be complete, including authors' initials, the title of the paper, the date, page numbers, and the name of the sponsoring society. Please compiles references as shown in the examples below. Figures are printed in black & white, while color figures are only available online. Adjust the size of figures and tables as they will be appeared. All figure captions should be legible, minimum 8 point type. For all equations, use either Microsoft Equation Editor or MathType add-on. Equations are numbered consecutively in parenthesis, e.g. (1), and set at the right margin.
