## SUBJECT

### A

ABAQUS, 328, 329, 330, 331, 332, 333, 336, 340, 341  
acrylic acid, 286, 287, 288, 289, 296  
active surge control, 342, 343  
activity adjustment, 394, 395, 399  
adsorption, 410, 411, 413, 414, 415, 416, 417, 418  
amplification factor, 93, 96, 97, 98, 101  
appraisal costs, 368, 378

### B

basin sediment structure, 93  
bead shape, 78, 79  
bead size, 78, 89  
bentonite, 286, 287, 288, 290, 291, 292, 293, 296  
blending electrolyzer, 455, 463  
bluff body flow, 436

### C

Ca-pectinate bead, 78, 79, 89  
capillary tube, 141, 143, 144, 145, 146, 149  
cassava starch, 286, 287, 288, 289, 290, 296  
chaos clone algorithm, 455, 456, 459, 463, 464  
circuit simulation, 170, 178  
compression systems, 342, 358  
computer vision, 258

concrete damaged plasticity, 328, 329, 330, 331, 333  
 construction projects, 368, 369, 370, 371, 378  
 continuum model, 195, 196, 197, 206  
 contractors, 368, 369, 370, 371, 374, 376, 377, 378, 379  
 core spreading, 436, 438, 439, 441  
 correlation, 141, 143, 145, 146, 147, 149  
 COV, 1, 12, 13, 14, 15  
 cyclic test, 361, 366

## D

dc energized electrostatic precipitator, 271  
 decay time, 123, 124, 126, 127, 130, 131, 132, 133, 134, 135, 136, 137, 138  
 decision support, 37  
 deformation, 245, 247, 248, 249, 250, 251, 252, 253, 254  
 depositional environment, 420, 428, 431, 432  
 diesel exhaust gas, 271  
 distance of collecting path, 455, 463  
 dolomite, 410, 411, 412, 413, 414, 415, 416, 417, 418  
 dual-core self-centering brace (SCB), 361, 366  
 dynamic behavior, 299, 305, 308, 312  
 dynamic model, 102  
 dynamic programming, 465, 466, 467, 469, 470, 471, 472, 473, 480

## E

earthquake mitigation, 93  
 economizer, 102, 104, 106, 107, 112, 113, 116, 118, 119, 121  
 electrolytic cell, 455, 456, 458, 459, 460, 461  
 electronic toll collection system, 180

energy dissipation, 17, 18, 19, 33, 34  
 error observability, 211, 219, 223  
 eruption, 245, 246, 247, 248, 251, 252, 253, 254  
 extrinsic parameters, 258, 263, 265, 268  
 extrusion-dripping method, 78

## F

face detection, 381  
 failure costs, 368, 369, 371, 377, 378, 379  
 fast multipole method, 436, 437, 442  
 fixed bed reactor, 299, 300, 306, 308, 309  
 flat plate, 328  
 frequency and incidence angle dependence, 93

## G

Game engine, 226, 231  
 genetic algorithm, 58, 59  
 GPGPU computing, 226, 227, 228  
 graft polymerization, 286, 289  
 gravity load, 17, 24, 25, 26, 27  
 green energy, 318

## H

$H_{\infty}$ , 152, 158, 169  
 Haskell's method, 93, 94  
 hazard, 245, 247, 252, 254  
 hydrocarbon refrigerant, 141  
 hydrogen, 318, 319, 320, 321, 323, 324, 325  
 hydrogeological parameters, 123, 124

## I

image sequence, 381, 382, 383, 384, 385, 386, 387, 389, 390, 391  
 industrial boiler, 102, 105, 109, 110, 118, 120  
 inertial, 211, 212, 213, 223  
 InSAR, 245, 247, 248, 250, 251, 252, 253, 254, 255, 256  
 intrinsic parameters, 258, 267, 269

inverse modeling, 58, 60

## K

Kelud, 245, 246, 247, 248, 250, 251, 252, 253, 254, 255

## L

La-doped NaTaO<sub>3</sub>, 318, 327  
Langmuir isotherm, 410, 413, 414, 416, 418  
lateral cyclic load, 17  
linear quadratic regulator, 342  
load settlement curve, 1  
low-cost, 211, 212, 213, 214, 215, 216, 217, 223

## M

mathematical modeling, 195  
methane, 195, 196, 201, 202, 206, 207, 208  
minimal repair, 465, 466, 467, 468, 469, 471, 472, 474, 475, 477, 478, 481  
minimum service standard, 180  
mitigation, 245, 247, 252  
mobile professional, 394, 395, 396, 399  
modeling and simulation, 299, 300  
MRS, 123, 134, 139  
multicolor, 381, 382, 383, 384, 386, 389, 391, 392  
multicore processor, 226

## N

nonlinear model, 342  
nonlinear, 152, 153, 154, 158, 162, 164  
nonlinearity cancellation, 342, 344

## O

Ombilin Basin, 420, 421, 422, 423, 433  
optimization, 58, 59, 61, 62, 69, 70, 71, 75  
organic geochemistry, 420, 421  
organic petrology, 420, 421  
oscillators, 170, 171, 172, 178

overhaul, 465, 466, 467, 468, 469, 470, 471, 473, 474, 475, 476, 478, 480, 481

oxidation, 195, 196, 202, 206, 207  
oxidation, 299, 300, 301, 303, 313

## P

parallel programming, 226, 227, 241  
parameter optimization, 170  
pectin, 78, 79, 80, 82, 83, 84, 85, 86, 87, 88, 89  
pedestrian navigation, 211, 212, 217, 223  
performance improvement, 226, 229  
phase noise, 170, 171, 174, 175, 176, 177, 178  
phosphate removal, 410, 411, 413, 414, 415, 417, 418  
photocatalyst, 318, 319, 320, 321, 322, 323, 325  
physical model, 102, 106, 107  
pile loading test, 1, 2, 4, 5, 9, 10, 11, 12, 15  
PnP problem, 258, 260, 261, 265  
polynomial fuzzy controller, 152, 153, 166  
polynomial fuzzy system, 152, 154, 157, 159, 160, 163, 166  
polynomial Lyapunov function, 152, 157, 160  
preprocessing, 381, 383, 385, 387, 390, 392  
prevention costs, 368, 379  
process scheduling, 455  
pulse-energized electrostatic precipitator, 271  
punching shear strength, 328, 336, 339, 340

## Q

quadratic hyperbolic, 1, 10  
quality costs, 368, 369, 370, 378, 379

**R**

replacement, 465, 466, 467, 468, 469, 470, 471, 474, 475, 478, 479, 480, 481  
 reservoir monitoring, 58  
 resonant parameters, 170  
 reverse flow reactor, 195, 197, 203, 206, 208

 vortex method, 436, 443, 447, 452

**W**

warranty, 465, 466, 467, 468, 469, 470, 473, 474, 475, 477, 478, 480, 481  
 water content, 123, 124, 126, 127, 129, 130, 131, 132, 133, 134, 136, 137, 138, 139

### List of Reviewers

---

1. Priyo Suprobo (Department of Civil Engineering, Sepuluh Nopember Institute of Technology, Surabaya, Indonesia)
2. Bambang Suhendro (Structural Laboratory, Department of Civil and Environmental Engineering, Gadjah Mada University, Yogyakarta, Indonesia)
3. Shyh-Jiann Hwang (Department of Construction Engineering, National Taiwan University of Science and Technology, Taipei, Taiwan)
4. Toshifumi Matsuoka (Environment and Resource System Engineering, Kyoto University, Kyoto, Japan)
5. Yoichi Fukuda (Department of Geophysics, Graduate School of Science, Kyoto University, Kyoto, Japan)
6. Brian Yuliarto (Materials Processing Laboratory, Engineering Physics Research Group, Institut Teknologi Bandung, Bandung, Indonesia)
7. Tjokorde Walmiki (Chemical Engineering Program, Institut Teknologi Bandung, Bandung, Indonesia)
8. T.A. Sanny (Geophysical Engineering, Institut Teknologi Bandung, Bandung, Indonesia)
9. Hiroe Miyake (Earthquake Research Institute, University of Tokyo, Tokyo, Japan)
10. Endra Susila (Civil Engineering Department, Faculty of Civil and Environmental Engineering, Institut Teknologi Bandung, Bandung, Indonesia)
11. Abdul Aziz Jayaputra (Geotechnical Engineering Research Group, Faculty of Civil and Environmental Engineering, Institut Teknologi Bandung, Bandung, Indonesia)
12. Muhammad Syahril Badri Kusuma (Water Engineering Research Group, Faculty of Civil and Environmental Engineering, Institut Teknologi Bandung, Bandung, Indonesia)
13. Manfred Fink (Department of Geoinformatics, Geohydrology and Modeling, Institute of Geography, Friedrich Schiller University of Jena, Jena, Germany)
14. Dudung Muhally Hakim (Remote Sensing and Geographic Information Science Research Group, Faculty of Earth Science and Technology, Institut Teknologi Bandung, Indonesia)
15. Eduard Cheres (Planning Devmt. and Technol. Div., Israel Electric Corp. Ltd., Haifa, Israel)
16. Tri Yuswidjajanto Zaenuri (Combustion Engines and Propulsion System Lab., Mechanical Engineering Dept., Institut Teknologi Bandung, Bandung, Indonesia)
17. Dwi H Widyantoro (School of Electrical Engineering and Informatics, Institut Teknologi Bandung, Bandung, Indonesia)
18. Hyung Woo Lee (Visiting Professor, Department of Chemical Engineering, Faculty of Industrial Technology, Institut Teknologi Bandung, Bandung, Indonesia)

19. Johnner Sitompul (Chemical Engineering, Faculty of Industrial Technology, Institut Teknologi Bandung, Bandung, Indonesia)
20. Ofyar Z. Tamin (Highway Engineering and Development, Transportation Engineering Research Group, Institut Teknologi Bandung, Bandung, Indonesia)
21. Salmah (Department of Mathematics, Faculty of Mathematics and Natural Sciences, Gadjah Mada University, Yogyakarta, Indonesia)
22. Bambang Riyanto Trilaksono (School of Electrical Engineering and Informatics, Institut Teknologi Bandung, Bandung, Indonesia)
23. Sigit Priyanto (Department of Civil and Environmental Engineering, Gadjah Mada University, Yogyakarta, Indonesia)
24. Satria Bijaksana (Faculty of Mining and Petroleum Engineering, Institut Teknologi Bandung, Bandung, Indonesia)
25. Martina Braun (Department of Applied Geophysics, Technical University of Berlin, Berlin, Germany)
26. Yuli S. Indartono (Faculty of Mechanical and Aerospace Engineering, Institut Teknologi Bandung, Bandung, Indonesia)
27. M. Idrus Al Hamid (Refrigeration and Air-Conditioning Laboratory, Mechanical Engineering Department - Faculty of Engineering, University of Indonesia, Depok, Indonesia)
28. Ferry Iskandar (Department of Physics, Faculty of Mathematics and Natural Sciences, Institut Teknologi Bandung, Bandung, Indonesia)
29. Pál M. Sipos (Department of Inorganic and Analytical Chemistry, Research Group of Environmental Chemistry, University of Szeged, Hungary)
30. Puji Lestari (Department of Environmental Engineering, Faculty of Civil and Environmental Engineering, Institut Teknologi Bandung, Bandung, Indonesia)
31. Ariadi Hazmi (Department of Electrical Engineering, Universitas Andalas, Padang, Indonesia)
32. Dani Jagadeesh (Department of Mechanical Engineering, Changwon National University, Changwon, South Korea)
33. Nanang Hariyanto (Faculty of Mining and Petroleum Engineering, Institut Teknologi Bandung, Bandung, Indonesia)
34. Setiawan Hadi (Informatics Department, University of Padjadjaran, Jatinangor-Sumedang, Indonesia)
35. Iping Supriana (School of Electrical Engineering and Informatics, Institut Teknologi Bandung, Bandung, Indonesia)
36. Obi Shinnosuke (Department of Mechanical Engineering, Keio University, Yokohama, Japan)
37. Mochammad Agoes Moelyadi (Faculty of Mechanical and Aerospace Engineering, Institut Teknologi Bandung, Bandung, Indonesia)
38. Hans-Martin Schulz (Helmoltz Centre Potsdam, GFZ German Research Centre for Geoscience Telegrafenberg, Potsdam, Germany)
39. Eddy A. Subroto (Faculty of Earth Sciences and Technology, Institut Teknologi Bandung, Bandung, Indonesia)

40. Sudarto Notosiswoyo (Research Group on Earth Resources Exploration, Faculty of Earth Sciences and Technology, Institut Teknologi Bandung, Bandung, Indonesia)
41. Rochim Suratman (Study Program of Materials Engineering, Faculty of Mechanical and Aerospace Engineering, Institut Teknologi Bandung, Bandung, Indonesia)
42. Ruzzakiah Jenal (Faculty of Information Science and Technology, Malaysia, National University of Malaysia, Selangor, Malaysia)
43. Lingjun Chou (State Key Laboratory for Oxo Synthesis and Selective Oxidation, Lanzhou Institute of Chemical Physic, Chinese Academy of Sciences,, Lanzhou, China)
44. Yo Fukushima (Disaster Prevention Research Institute, Kyoto University, Kyoto, Japan)
45. Tommy J. Gravdahl (Dept. of Engineering Cybernetics, Norwegian University of Science and Technology (NTNU),Trondheim, Norway)
46. Binsar Hariandja (Structural Engineering Research Group, Civil Engineering Department, Institut Teknologi Bandung, Bandung, Indonesia)
47. Herlien Dwiarti Soemari (Structural Engineering Research Group, Civil Engineering Department, Institut Teknologi Bandung, Bandung, Indonesia)
48. Iswandi Imran (Structural Engineering Research Group, Civil Engineering Department, Institut Teknologi Bandung, Bandung, Indonesia)
49. Leksmono Suryo Putranto (Universitas Tarumanegara, Jakarta, Indonesia)
50. Yusak Octavius Susilo (Royal Institute of Technology, Sweden)
51. Ade Sjafruddin (Faculty of Civil and Environmental Engineering, Institut Teknologi Bandung, Bandung, Indonesia)
52. Biemo W. Soemardi (Faculty of Civil and Environmental Engineering, Institut Teknologi Bandung, Bandung, Indonesia)
53. Krishna Suryanto (Faculty of Civil and Environmental Engineering, Institut Teknologi Bandung, Bandung, Indonesia)
54. Narimah Kasim (University Tun Hussein Onn Malaysia, Malaysia)
55. Enri Damanhuri (Faculty of Civil and Environmental Engineering, Institut Teknologi Bandung, Bandung, Indonesia)
56. Masayuki Takeguchi (Numazu National College of Technology, Japan)
57. Adang Surachman (Faculty of Civil and Environmental Engineering, Institut Teknologi Bandung, Bandung, Indonesia)
58. Saptahari M. Soegiri Poetra (Faculty of Civil and Environmental Engineering, Institut Teknologi Bandung, Bandung, Indonesia)

## **Journal of Engineering and Technological Sciences**

### **Guidelines for Author**

#### **1. Standard of reporting**

Authors should present an accurate account of the work performed as well as an objective discussion of its significance. Underlying data should be represented accurately in the paper. A paper should contain sufficient detail and references to permit others to replicate the work. Fraudulent or knowingly inaccurate statements constitute unethical behavior and are unacceptable. Professional publication articles should also be accurate and objective, and editorial 'opinion' works should be clearly identified.

#### **2. Exclusivity of work**

The authors should ensure that they have written entirely original works, and if the authors have used the work and/or words of others this should be appropriately cited or quoted. Plagiarism takes many forms, from 'passing off' another's paper as the author's own paper to copying or paraphrasing substantial parts of another's paper (without attribution), to claiming results from research conducted by others. Plagiarism in all its forms constitutes unethical publishing behavior and is unacceptable. An author should not in general publish manuscripts describing essentially the same research in more than one journal or primary publication. Submitting the same manuscript to more than one journal concurrently constitutes unethical publishing behaviour and is unacceptable. In general, an author should not submit for consideration in another journal a previously published paper. We consider for publication from conference paper if it is only an extended version of conference paper with at least 30% of new material.

#### **3. Hazards and Human or Animal Subjects**

If the work involves chemicals, procedures or equipment that have any unusual hazards inherent in their use, the author must clearly identify these in the manuscript. If the work involves the use of animal or human subjects, the author should ensure that the manuscript contains a statement that all procedures were performed in compliance with relevant laws and institutional guidelines and that the appropriate institutional committee(s) has approved them. Authors should include a statement in the manuscript that the informed consent was obtained for experimentation with human subjects. The privacy rights of human subjects must always be observed.

#### **4. Authorship of the Paper and Copyright**

Authorship should be limited to those who have made a significant contribution to the conception, design, execution, or interpretation of the reported work. All those who have made significant contributions should be listed as co-authors. Whilst those who have participated in certain substantive aspects of the research project, they should be acknowledged or listed as contributors. The corresponding author should ensure that all appropriate and inappropriate co-authors are included on the paper, and that all co-authors have seen and approved the final version of the paper and have agreed to its submission for publication. No manuscript can be published unless accompanied by a signed publication agreement, which serves as a transfer of copyright from author to publisher. A copy of that agreement is required after the paper is accepted.

#### **5. Acknowledgement**

Proper acknowledgment of the work of others must always be given. Authors should cite publications that have been influential in determining the nature of the reported work. Information obtained privately, as in conversation, correspondence or discussion with third parties, must not be used or reported without explicit, written permission from the source. Information obtained in the course of confidential services, such as refereeing manuscripts or grant applications, must not be used without the explicit written permission of the author of the work involved in these services.

#### **6. Disclosure Requirements**

Author when submitting a manuscript, must disclose any meaningful affiliation or involvement, either direct or indirect, with any organization or entity with a direct financial interest in the subject matter or materials discussed (for example, employment, consultancies, stock ownership, grants, patents received or pending, royalties, honoraria, expert testimony). These kinds of financial involvement are fairly common, unavoidable, and generally do not constitute a basis for rejecting a manuscript. Specifics of the disclosure will remain confidential. If deemed appropriate by the Scientific Editor, a general statement regarding disclosure will be included in the Acknowledgment section of the manuscript.

#### **7. Errors in Published Works**

When an author discovers a significant error or inaccuracy in his/her own published work, it is the author's obligation to promptly notify the journal editor or publisher and cooperate with the editor to retract or correct the paper. If the editor or the publisher learns from a third party that a published work contains a significant error, it is the obligation of the author to promptly retract or correct the paper or provide evidence to the editor of the correctness of the original paper.

#### **8. Disclaimer**

Opinions expressed in articles published in the *Journal of Engineering and Technological Sciences* are those of the author(s) and do not necessarily represent opinions of the Bandung Institute of Technology (ITB). The *Journal of Engineering and Technological Sciences* does not guarantee the appropriateness for any purpose of any method, product, process, or device described or identified in an article. Trade names, when used, are only for identification and do not constitute endorsement by *Journal of Engineering and Technological Sciences*.

## 9. Manuscript preparation

Use the English language and the SI system (Système International d'Unités, often referred as "International Units") for measurements and units. Manuscript in MS Word or PDF format (generated from MS Word) is to be submitted online through <http://journal.itb.ac.id/>. The length of manuscript is expected not to exceed 20 printed pages (single space) including abstract, figures, tables and references. An abstract between 100 and 200 words describes the significance of manuscript should be included. The authors should supply 5-10 keyword or phrases that characterizes their manuscript. Use 11 pt Times New Roman fonts for body of the text with 1.0 line spacing between lines. The references should be numbered consecutively in the order of their appearance and should be complete, including authors' initials, the title of the paper, the date, page numbers, and the name of the sponsoring society. Please compiles references as shown in the examples below. Figures are printed in black & white, while color figures are only available online. Adjust the size of figures and tables as they will be appeared. All figure captions should be legible, minimum 8 point type. For all equations, use either Microsoft Equation Editor or MathType add-on. Equations are numbered consecutively in parenthesis, e.g. (1), and set at the right margin.
