List of Reviewers

1. Tallha Akram (Department of Electrical Engineering, COMSATS University Islamabad, Wah Campus, Pakistan)
2. Ashwak Alabaichi (Department of Biomedical Engineering, Engineering College, University of Kerbala, Iraq)
3. Mojtaba Alizadeh (Computer Engineering Department, Lorestan University, Khorramabad, Iran)
4. Amirullah Amirullah (Department of Electrical Engineering, Faculty of Engineering, Universitas Bhayangkara Surabaya, Indonesia)
5. Andre Luiz Appel (Instituto Brasileiro de Informação em Ciência e Tecnologia, Universidade Federal Do Rio de Janeiro, Rua Lauro Müller, 455, Rio de Janeiro, RJ, Brazil)
6. A. S. Arunachalam (Department of Computer Science, Vels Institute of Science, Technology and Advanced Studies (VISTAS), Chennai, India)
7. Dibya Jyoti Bora (Barkatullah University, India)
8. Ruey Maw Chen (Department of Computer Science and Information Engineering, National Chin-Yi University of Technology, Taichung, Taiwan)
9. Sinan Chen (Graduate School of System Informatics, Kobe University, 1-1 Rokkodai-cho, Nada, Kobe, Japan)
10. Ziaul Haque Choudhury (Department of Information Technology, B.S. Abdur Rahman Crescent Institute of Science and Technology (Deemed to be University), Chennai, India)
11. Donny Danudirdjo (School of Electrical Engineering and Informatics, Institut Teknologi Bandung, Indonesia)
12. Tran Duc-Tan (University of Engineering Technology, Vietnam National University, Hanoi, Vietnam)
13. Ferda Ernawan (Faculty of Computer Systems and Software Engineering, Universiti Malaysia Pahang, Malaysia)
14. Alaa K. Farhan (Computer Sciences Department, University of Technology, Baghdad, Iraq)
15. Thippa Reddy Gadekallu (School of Information Technology and Engineering, Vellore Institute of Technology, Vellore, Tamil Nadu, India)
16. Sadrieh Hajesmaeel Gohari (Kerman University of Medical Sciences, Haft-Bagh Highway, PO Box 7616911320, Kerman, Iran)
17. Isaías González (Department of Electronic, Computer Science and Automation Engineering, University of Huelva, Escuela Técnica Superior, Spain)
18. Afrida Helen (Computer Science Department, Universitas Padjadjaran, Jatinangor, Sumedang)

19. Shafaf Ibrahim (Faculty of Computer and Mathematical Sciences, Universiti Teknologi Mara, Melaka Branch Jasin Campus, Merlimau, Melaka, Malaysia)
20. Muhammad Okky Ibrohim (Faculty of Computer Science, Universitas Indonesia, Depok, Indonesia)
21. Waheb A. Jabbar (Universiti Malaysia Pahang, Malaysia)
22. Justin Joseph (Department of Biomedical Engineering, National Institute of Technology, Raipur, Chhattisgarh, India)
23. Jeevanandam Jotheeswaran (Galgotias University, Greater Noida, Uttar Pradesh, India)
24. Norhaslinda Kamaruddin (Advanced Analytics and Engineering Center (AAEC), Universiti Teknologi MARA, Shah Alam, Selangor, Malaysia)
25. Samantha L.C. Kang (University of California Santa Barbara, Santa Barbara, United States)
26. Marcin Staniek"
27. Oscar Karnalim (Faculty of Information Technology, Maranatha Christian University, Bandung, Indonesia)
28. Amanpreet Kaur (IK Gujral Punjab Technical University, India)
29. Mahdi Khosravy (Media Integrated Communication Laboratory, Graduate School of Engineering, Osaka University, Osaka, Japan)
30. Achmad Imam Kistijantoro (School of Electrical Engineering and Informatics, Institut Teknologi Bandung, Indonesia)
31. Samuel Lalmuanawma (Department of Mathematics & Computer Science, Mizoram University, Tanhril, Aizawl, Mizoram, India)
32. Liangyi Li (Program of Learning Sciences, Institute for Research Excellence in Learning Sciences, National Taiwan Normal University, Taipei City, Taiwan)
33. Ritika Lohiya (Department of Computer Science and Engineering, Institute of Technology, Nirma University, Ahmedabad, Gujarat, India)
34. Abdul Majeed (School of Information and Electronics Engineering, Korea Aerospace University, Deogyang-gu, Goyang-si, Gyeonggi-do, South Korea)
35. Krzysztof Małeck (Faculty of Computer Science, West Pomeranian University of Technology, Szczecin, Poland)
36. Aneta Poniszewska-Maranda (Institute of Information Technology, Lodz University of Technology, Łódź, Poland)
37. Pavel Mašek (Department of Telecommunication, Brno University of Technology, Brno, Czech Republic)
38. Dulani Meedeniya (University of Moratuwa, Sri Lanka)
39. Max E.Vizcarra Melgar (Centro Universitário IESB, Samsung Research Institute Brazil, Brazil)

40. Mohammed Nasser Al-Mhiqani (Center for Advanced Computing Technology, Universiti Teknikal Malaysia Melaka, Melaka, Malaysia)
41. Eueung Mulyana (School of Electrical Engineering and Informatics, Institut Teknologi Bandung, Indonesia)
42. Asep Najmurrokhman (Control Engineering, Universitas Jenderal Achmad Yani, Bandung, Indonesia)
43. Amandeep Noliya (Department of Computer Science and Engineering, Guru Jambheshwar University of Science and Technology, Hisar, Haryana, India)
44. A. J. Onumanyi (Department of Electrical, Electronic and Computer Engineering, University of Pretoria, Pretoria, South Africa)
45. Jugraj Singh Randhawa (Department of Mechanical Engineering, Global Institute of Management and Emerging Technologies, Amritsar, Punjab, India)
46. Wan Norhisyam Abd Rashid (Fakulti Teknologi Kejuruteraan, Universiti Teknikal Malaysia, Melaka, Malaysia)
47. Arwindra Rizqiawan (School of Electrical Engineering and Informatics, Institut Teknologi Bandung, Indonesia)
48. Yuichi Sei (University of Electro-Communications, Tokyo, Japan)
49. Shaik Shafi (Department of ECE, BVRIIT, Narsapur, Medak, Telangana, India)
50. Prashant Kumar Singh (Department of Electronics and Communication Engineering, University College of Engineering and Technology (UCET), VBU, Hazaribag, Jharkhand, India)
51. Marcin Staniek (Silesian University of Technology, Gliwice, Poland)
52. Bayu Adhi Tama (Department of Mechanical Engineering, Pohang University of Science and Technology, Pohang, 37673, South Korea)
53. Jenny Marcela Sánchez-Torres (Computing Systems and Industrial Engineering Dept., Universidad Nacional de Colombia, Bogotá, Colombia)
54. Hakan Tüzün (Hacettepe University, Department of Computer Education and Instructional Technology, Ankara, Turkey)
55. Dinesh Kumar Vishwakarma (Biometric Research Laboratory, Department of Information Technology, Delhi Technological University, New Delhi, India)
56. Ola A. Al-Wesabi (School of Computer Science, Universiti Sains Malaysia (USM), Gelugor, Penang, Malaysia)
57. Eri Prasetyo Wibowo (Center for Microelectronics and Image Processing Studies, Gunadarma University, Indonesia)
58. Dedy Rahman Wijaya (School of Applied Science, Telkom University, Bandung, Indonesia)

59. Jason W. Woodworth (School of Computing and Informatics, University of Louisiana at Lafayette, Lafayette, LA, United States)
60. Tianhua Xu (Communications and Information Systems Group, Department of Electronic and Electrical Engineering, University College London, United Kingdom)
61. Yongquan Zhou (Key Laboratories of Guangxi High Schools Complex System and Computational Intelligence, Nanning, Guangxi, China)

Journal of ICT Research and Applications Guidelines for Author

1. Standard of reporting

Authors should present an accurate account of the work performed as well as an objective discussion of its significance. Underlying data should be represented accurately in the paper. A paper should contain sufficient detail and references to permit others to replicate the work. Fraudulent or knowingly inaccurate statements constitute unethical behavior and are unacceptable. Professional publication articles should also be accurate and objective, and editorial 'opinion' works should be clearly identified.

2. Exclusivity of work

The authors should ensure that they have written entirely original works, and if the authors have used the work and/or words of others this should be appropriately cited or quoted. Plagiarism takes many forms, from 'passing off' another's paper as the author's own paper to copying or paraphrasing substantial parts of another's paper (without attribution), to claiming results from research conducted by others. Plagiarism in all its forms constitutes unethical publishing behavior and is unacceptable. An author should not in general publish manuscripts describing essentially the same research in more than one journal or primary publication. Submitting the same manuscript to more than one journal concurrently constitutes unethical publishing behaviour and is unacceptable. In general, an author should not submit for consideration in another journal a previously published paper. We consider for publication from conference paper if it is only an extended version of conference paper with at least 30% of new material.

3. Hazards and Human or Animal Subjects

If the work involves chemicals, procedures or equipment that have any unusual hazards inherent in their use, the author must clearly identify these in the manuscript. If the work involves the use of animal or human subjects, the author should ensure that the manuscript contains a statement that all procedures were performed in compliance with relevant laws and institutional guidelines and that the appropriate institutional committee(s) has approved them. Authors should include a statement in the manuscript that the informed consent was obtained for experimentation with human subjects. The privacy rights of human subjects must always be observed.

4. Authorship of the Paper and Copyright

Authorship should be limited to those who have made a significant contribution to the conception, design, execution, or interpretation of the reported work. All those who have made significant contributions should be listed as co-authors. Whilst those who have participated in certain substantive aspects of the research project, they should be acknowledged or listed as contributors. The corresponding author should ensure that all appropriate and inappropriate co-authors are included on the paper, and that all co-authors have seen and approved the final version of the paper and have agreed to its submission for publication. No manuscript can be published unless accompanied by a signed publication agreement, which serves as a transfer of copyright from author to publisher. A copy of that agreement is required after the paper is accepted.

5. Acknowledgement

Proper acknowledgment of the work of others must always be given. Authors should cite publications that have been influential in determining the nature of the reported work. Information obtained privately, as in conversation, correspondence or discussion with third parties, must not be used or reported without explicit, written permission from the source. Information obtained in the course of confidential services, such as refereeing manuscripts or grant applications, must not be used without the explicit written permission of the author of the work involved in these services.

6. Disclosure Requirements

Author when submitting a manuscript, must disclose any meaningful affiliation or involvement, either direct or indirect, with any organization or entity with a direct financial interest in the subject matter or materials discussed (for example, employment, consultancies, stock ownership, grants, patents received or pending, royalties, honoraria, expert testimony). These kinds of financial involvement are fairly common, unavoidable, and generally do not constitute a basis for rejecting a manuscript. Specifics of the disclosure will remain confidential. If deemed appropriate by the Scientific Editor, a general statement regarding disclosure will be included in the Acknowledgment section of the manuscript.

7. Errors in Published Works

When an author discovers a significant error or inaccuracy in his/her own published work, it is the author's obligation to promptly notify the journal editor or publisher and cooperate with the editor to retract or correct the paper. If the editor or the publisher learns from a third party that a published work contains a significant error, it is the obligation of the author to promptly retract or correct the paper or provide evidence to the editor of the correctness of the original paper.

8. Disclaimer

Opinions expressed in articles published in the *Journal of ICT Research and Applications* are those of the author(s) and do not necessarily represent opinions of the Bandung Institute of Technology (ITB). The *Journal of ICT Research and Applications* does not guarantee the appropriateness for any purpose of any method, product, process, or device described or identified in an article. Trade names, when used, are only for identification and do not constitute endorsement by *Journal of ICT Research and Applications*.

9. Manuscript preparation

Use the English language and the SI system (Système International d'Unités, often referred as "International Units") for measurements and units. Manuscript in MS Word or PDF format (generated from MS Word) is to be submitted online through <http://journals.itb.ac.id/index.php/jictra>. The length of manuscript is expected not to exceed 20 printed pages (single space) including abstract, figures, tables and references. An abstract between 100 and 200 words describes the significance of manuscript should be included. The authors should supply 5-10 keyword or phrases that characterizes their manuscript. Use 11 pt Times New Roman fonts for body of the text with 1.0 line spacing between lines. The references should be numbered consecutively in the order of their appearance and should be complete, including authors' initials, the title of the paper, the date, page numbers, and the name of the sponsoring society. Please compiles references as shown in the examples below. Figures are printed in black & white, while color figures are only available online. Adjust the size of figures and tables as they will be appeared. All figure captions should be legible, minimum 8 point type. For all equations, use either Microsoft Equation Editor or MathType add-on. Equations are numbered consecutively in parenthesis, e.g. (1), and set at the right margin.
