SUBJECT

9
9-ethoxy-1,10-octadecanediol, 13, 15, 18, 22, 23, 24, 26, 27

α
(α, β,γ) interval cut set of interval valued neutrosophic sets, 103

A
Acceptance sampling, 72
ADMET prediction, 203
Antioxidant, 192, 197, 201, 203
antiplatelet, 203, 204, 218
aorta, 332, 333, 334, 335, 336, 337, 340, 342
approximate solutions, 221, 222, 223, 228, 229, 230

B
block methods, 40, 41, 42, 43, 54, 57
boundedness, 1, 2, 3, 10
breakdown, 148, 149, 150, 152, 154, 163

C
caprine CSN1S2 protein, 332, 333, 334, 336, 338, 340, 342

E
exact solution, 28, 35
extrapolation, 148, 153, 155, 156

F
ferulic acid, 203, 204, 207, 211, 213, 214, 216, 217
flavonoids, 192, 197, 201
fractional differential equations, 28, 37

G
generalized algorithm, 40, 41, 43
global existence, 1, 2, 3, 10
Green sea turtle, 59

H
higher derivative, 40, 41, 47
higher order, 40, 57

Hsp90, 303, 304, 305, 306, 307, 308, 309, 310, 311, 312, 313
hydrophilicity, 182, 184, 185, 189, 190
hypoxia, 59, 60, 61, 62, 65, 66, 67, 68

I
immunocytochemistry, 59, 61, 62
inflammation, 332, 333, 341, 342
integro-differential equation, 1
interpolation, 148, 153, 154, 156, 163
interval valued neutrosophic sets, 103, 104, 106, 110, 113, 114, 115, 116, 118

K
k-step, 40, 41, 43

L
Lanczos-type algorithms, 148, 149, 150, 151, 152, 157, 159, 162, 163
landslide, 166, 167, 168, 169, 170, 171, 174, 175, 176, 177, 178, 179, 180
leader behavior, 121, 124, 125, 126, 128, 129, 133, 134, 137, 139
leadership style, 121, 130, 139
leadership, 121, 122, 123, 124, 125, 126, 130, 131, 132, 133, 134, 135, 138, 139

velocity estimation, 166, 167

W
wave, 273, 277, 285, 286, 289
Western blotting, 59, 62

List of Reviewers

1. Abdelhai Elazzouzi (Universite Moulay Ismail, Department of Mathematics, Meknes, Morocco)
2. Abdul Rajjak Shaikh (Kobe University, Department of Chemical Science and Engineering, Kobe, Japan)
3. Aep Patah (Institut Teknologi Bandung, Faculty of Mathematics and Natural Sciences, Division of Inorganic and Physical Chemistry, Indonesia)
4. Agnieszka Kowalska (Uniwersytet Pedagogiczny im. Komisji Edukacji Narodowej, Institute of Mathematics, Krakow, Poland)
5. Akfiny Hasdi Aimon (Institut Teknologi Bandung, Department of Physics, Bandung, Indonesia)
6. Alena Vagaská (Technical University of Kosice, Faculty of Manufacturing Technologies with a seat in Presov, Presov, Slovakia)
7. Alireza Khalili Golmankhaneh (Young Researchers and Elite Club, Urmia Branch, Islamic Azad University, Urmia, Iran)
8. Anthony Mutukumira (Massey University, Auckland, Institute of Food, Nutrition and Human Health, Auckland, New Zealand)
9. Ants Aasma (Tallinn University of Technology, Department of Economics, Tallinn, Estonia)
10. Avanish Kumar Chaturvedi (University of Allahabad, Department of Mathematics, Allahabad, India)
11. Azizan Saaban (Universiti Utara Malaysia, School of Quantitative Sciences UUM College of Arts and Sciences,Malaysia)
12. Bimo Ario Tejo (UCSI University, Faculty of Applied Sciences, Kuala Lumpur, Malaysia)
13. Brian Yuliarto (Institut Teknologi Bandung, Department of Engineering Physics, Bandung, Indonesia)
14. Catherine Leigh Broadhurst (University of Maryland, Baltimore County, Department of Mechanical Engineering, Baltimore, United States)
15. David Vališ (Univerzita obrany v Brne, Department of Combat and Special Vehicles, Brno)
16. Didin Mujahidin (Institut Teknologi Bandung, Division of Organic Chemistry, Bandung, Indonesia)
17. Donatella Occorsio (Universita degli Studi della Basilicata, Department of Mathematics, Potenza, Italy)
18. Eizi Suzuki (Kagoshima University, Department of Earth & Environmental Sciences, Japan)
19. Erythrina Stavila (Institut Teknologi Bandung, Research Center for Nanosciences and Nanotechnology, Bandung, Indonesia)

20. Esin Aki-Yalcin (Ankara Universitesi, Department of Pharmaceutical Chemistry, Ankara, Turkey)
21. Fatkhan Fatkhan (Institut Teknologi Bandung, Exploration and Engineering Seismology Research Group, Bandung, Indonesia)
22. Françoise Méchin (Laboratoire Ingenierie des Materiaux Polymeres UMR 5223, Villeurbanne, France)
23. Fu-Gui Shi (Beijing Institute of Technology, School of Mathematics and Statistics, Beijing, China)
24. Gianfranco Caruso (Universita degli Studi di Roma La Sapienza, Department of Astronautical, Roma, Italy)
25. Habibis Saleh (Riau University, Department of Mathematics, Pekanbaru, Indonesia)
26. Hadi Susanto (University of Essex, Department of Mathematical Sciences, Colchester, United Kingdom)
27. Hendra Jitno (Group Geotechnical Engineer, Brisbane, Australia)
28. Hendri Widiyandari (Universitas Diponegoro, Department of Physics, Semarang, Indonesia)
29. Hendry Izaac Elim (Universitas Pattimura, Department of Physics, Ambon, Indonesia)
30. Higinio Ramos Calle (Universidad de Salamanca, Department of Applied Mathematics, Salamanca, Spain)
31. Hüseyin Bor (P.O. Box 121, Bahçelievler, Ankara, 06502, Turkey)

88. Yuniar Ponco Prananto (Brawijaya University, Department of Chemistry, Faculty of Mathematics and Natural Sciences, Malang, Indonesia)

Journal of Mathematical and Fundamental Sciences
Guidelines for Author

1. Standard of reporting
Authors should present an accurate account of the work performed as well as an objective discussion of its significance. Underlying data should be represented accurately in the paper. A paper should contain sufficient detail and references to permit others to replicate the work. Fraudulent or knowingly inaccurate statements constitute unethical behavior are unacceptable. Professional publication articles should also be accurate and objective, and editorial 'opinion' works should be clearly identified.

2. Exclusivity of work
The authors should ensure that they have written entirely original works, and if the authors have used the work and/or words of others this should be appropriately cited or quoted. Plagiarism takes many forms, from 'passing off' another's paper as the author's own paper to copying or paraphrasing substantial parts of another's paper (without attribution), to claiming results from research conducted by others. Plagiarism in all its forms constitutes unethical publishing behavior and is unacceptable. An author should not in general publish manuscripts describing essentially the same research in more than one journal or primary publication. Submitting the same manuscript to more than one journal concurrently constitutes unethical publishing behaviour and is unacceptable. In general, an author should not submit for consideration in another journal a previously published paper. We consider for publication from conference paper if it is only an extended version of conference paper with at least 30% of new material.

3. Hazards and Human or Animal Subjects
If the work involves chemicals, procedures or equipment that have any unusual hazards inherent in their use, the author must clearly identify these in the manuscript. If the work involves the use of animal or human subjects, the author should ensure that the manuscript contains a statement that all procedures were performed in compliance with relevant laws and institutional guidelines and that the appropriate institutional committee(s) has approved them. Authors should include a statement in the manuscript that the informed consent was obtained for experimentation with human subjects. The privacy rights of human subjects must always be observed.

4. Authorship of the Paper and Copyright
Authorship should be limited to those who have made a significant contribution to the conception, design, execution, or interpretation of the reported work. All those who have made significant contributions should be listed as co-authors. Whilst those who have participated in certain substantive aspects of the research project, they should be acknowledged or listed as contributors. The corresponding author should ensure that all appropriate and inappropriate co-authors are included on the paper, and that all co-authors have seen and approved the final version of the paper and have agreed to its submission for publication. No manuscript can be published unless accompanied by a signed publication agreement, which serves as a transfer of copyright from author to publisher. A copy of that agreement is required after the paper is accepted.

5. Acknowledgement
Proper acknowledgment of the work of others must always be given. Authors should cite publications that have been influential in determining the nature of the reported work. Information obtained privately, as in conversation, correspondence or discussion with third parties, must not be used or reported without explicit, written permission from the source. Information obtained in the course of confidential services, such as refereeing manuscripts or grant applications, must not be used without the explicit written permission of the author of the work involved in these services.

6. Disclosure Requirements
Author when submitting a manuscript, must disclose any meaningful affiliation or involvement, either direct or indirect, with any organization or entity with a direct financial interest in the subject matter or materials discussed (for example, employment, consultancies, stock ownership, grants, patents received or pending, royalties, honoraria, expert testimony). These kinds of financial involvement are fairly common, unavoidable, and generally do not constitute a basis for rejecting a manuscript. Specifics of the disclosure will remain confidential. If deemed appropriate by the Scientific Editor, a general statement regarding disclosure will be included in the Acknowledgment section of the manuscript.

7. Errors in Published Works
When an author discovers a significant error or inaccuracy in his/her own published work, it is the author's obligation to promptly notify the journal editor or publisher and cooperate with the editor to retract or correct the paper. If the editor or the publisher learns from a third party that a published work contains a significant error, it is the obligation of the author to promptly retract or correct the paper or provide evidence to the editor of the correctness of the original paper.

8. Disclaimer
Opinions expressed in articles published in the *Journal of Mathematical and Fundamental Sciences* are those of the author(s) and do not necessarily represent opinions of the Bandung Institute of Technology (ITB). The *Journal of Mathematical and Fundamental Sciences* does not guarantee the appropriateness for any purpose of any method, product, process, or device described or identified in an article.
