SUBJECT**1**

1D electrical resistivity, 344, 346, 354

5

5,7-dihydroxy-3,4',8-trimethoxyflavone, 97, 98, 99, 101, 102

A

analytic function, 49, 50, 65
 antagonistic, 16, 17
 antibacterial properties, 231
 anti-cancer, 451
 anti-inflammatory, 218, 219, 221
 aquifer, 344, 345, 346, 349, 350, 351, 353, 354
 Argiope appensa, 324, 325, 326, 331, 336
 auxiliary variable, 1

B

bacteria, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27
 Balanophora elongate, 231
 Balanophoraceae, 231, 239
 basic reproduction number, 166, 243, 248, 250, 251, 255, 256, 258
 basic reproduction, 358, 359, 360, 366, 367
 behavior, 286, 287, 292
 biomaterial, 325
 bioturbation, 286, 287, 289
 bi-univalent function, 49
 Bombyx mori, 324, 325, 336
 boundedness, 261
 brackish, 286, 300, 301
 breast cancer cell line, 97
 breast cancer cells, 109, 110, 112, 114, 115
 buoyancy force, 395, 396

C

cell attachment, 325, 331, 337
 cell morphology, 325, 329, 337, 338
 cercariae, 243, 245, 246, 247, 248, 249, 250, 251, 256, 258
 Chebyshev polynomial, 49, 52, 53

CIMIS-Penman, 182, 184, 186, 187, 191, 192, 193, 194, 195, 196
 Claisen-Schmidt condensation, 86, 87, 89, 90, 91
 cluster of galaxies, 428
 clustering, 358
 concentric pipes, 395, 397, 411
 confidence interval, 306, 308, 314
 control campaign, 200, 205, 208, 209, 212
 convex function, 67, 69, 82, 83, 84
 Coronavirus disease 2019, 306
 COVID-19, 358, 359, 360, 366, 367, 368
 cost-effectiveness analysis, 134, 136, 160
 CTMC approach, 31, 33
 cytotoxic activity, 97, 98, 105
 cytotoxic, 109, 110, 111, 112, 114

D

delay logistic time series, 306, 315, 316, 317, 318, 319, 320, 321
 Dengue, 466, 467, 468, 469, 475, 476, 477, 478, 479, 480, 481, 482, 483, 484, 485, 486
 density functional theory, 369, 370
 diameter, 286, 287, 290, 293
 differentiation, 415, 416, 418, 419, 421, 422, 423, 424, 425
 dihydromicromelin derivatives, 97
 disease outbreak probability, 31
 divided difference of a function, 67, 68
 docking, 218, 219, 220, 221, 222, 230
 doubling period, 358, 361, 362, 363, 364, 366
 drug treatment, 200, 202, 203
 Dynamic Time Warping distance, 466
 dynamical systems, 358

E

Journal of Mathematical and Fundamental Sciences

Guidelines for Author

1. Standard of reporting

Authors should present an accurate account of the work performed as well as an objective discussion of its significance. Underlying data should be represented accurately in the paper. A paper should contain sufficient detail and references to permit others to replicate the work. Fraudulent or knowingly inaccurate statements constitute unethical behavior and are unacceptable. Professional publication articles should also be accurate and objective, and editorial 'opinion' works should be clearly identified.

2. Exclusivity of work

The authors should ensure that they have written entirely original works, and if the authors have used the work and/or words of others this should be appropriately cited or quoted. Plagiarism takes many forms, from 'passing off' another's paper as the author's own paper to copying or paraphrasing substantial parts of another's paper (without attribution), to claiming results from research conducted by others. Plagiarism in all its forms constitutes unethical publishing behavior and is unacceptable. An author should not in general publish manuscripts describing essentially the same research in more than one journal or primary publication. Submitting the same manuscript to more than one journal concurrently constitutes unethical publishing behaviour and is unacceptable. In general, an author should not submit for consideration in another journal a previously published paper. We consider for publication from conference paper if it is only an extended version of conference paper with at least 30% of new material.

3. Hazards and Human or Animal Subjects

If the work involves chemicals, procedures or equipment that have any unusual hazards inherent in their use, the author must clearly identify these in the manuscript. If the work involves the use of animal or human subjects, the author should ensure that the manuscript contains a statement that all procedures were performed in compliance with relevant laws and institutional guidelines and that the appropriate institutional committee(s) has approved them. Authors should include a statement in the manuscript that the informed consent was obtained for experimentation with human subjects. The privacy rights of human subjects must always be observed.

4. Authorship of the Paper and Copyright

Authorship should be limited to those who have made a significant contribution to the conception, design, execution, or interpretation of the reported work. All those who have made significant contributions should be listed as co-authors. Whilst those who have participated in certain substantive aspects of the research project, they should be acknowledged or listed as contributors. The corresponding author should ensure that all appropriate and inappropriate co-authors are included on the paper, and that all co-authors have seen and approved the final version of the paper and have agreed to its submission for publication. No manuscript can be published unless accompanied by a signed publication agreement, which serves as a transfer of copyright from author to publisher. A copy of that agreement is required after the paper is accepted.

5. Acknowledgement

Proper acknowledgment of the work of others must always be given. Authors should cite publications that have been influential in determining the nature of the reported work. Information obtained privately, as in conversation, correspondence or discussion with third parties, must not be used or reported without explicit, written permission from the source. Information obtained in the course of confidential services, such as refereeing manuscripts or grant applications, must not be used without the explicit written permission of the author of the work involved in these services.

6. Disclosure Requirements

Author when submitting a manuscript, must disclose any meaningful affiliation or involvement, either direct or indirect, with any organization or entity with a direct financial interest in the subject matter or materials discussed (for example, employment, consultancies, stock ownership, grants, patents received or pending, royalties, honoraria, expert testimony). These kinds of financial involvement are fairly common, unavoidable, and generally do not constitute a basis for rejecting a manuscript. Specifics of the disclosure will remain confidential. If deemed appropriate by the Scientific Editor, a general statement regarding disclosure will be included in the Acknowledgment section of the manuscript.

7. Errors in Published Works

When an author discovers a significant error or inaccuracy in his/her own published work, it is the author's obligation to promptly notify the journal editor or publisher and cooperate with the editor to retract or correct the paper. If the editor or the publisher learns from a third party that a published work contains a significant error, it is the obligation of the author to promptly retract or correct the paper or provide evidence to the editor of the correctness of the original paper.

8. Disclaimer

Opinions expressed in articles published in the *Journal of Mathematical and Fundamental Sciences* are those of the author(s) and do not necessarily represent opinions of the Bandung Institute of Technology (ITB).
